# Horizontal bagging machine

## LOGI WRAP 800

The Logi Wrap 800 is a fully automatic horizontal bagging machine for random size products. It is especially designed for the mailing and logistics industry to manage the mailing and returns in an effective and efficient way. Easy to integrate into the product flow of any supply chain, or also to be used as a stand-alone solution.

### Technical specifications

	Logi Wrap 800
Dimensions: length x width x height	1800 x 1300 x 2100
Transverse seal bar, length	850
Seal bar clearance height	up to 250 mm
Product length, min.	120 mm
Packaging capacity, max.	1800 cycles / hour
Film, flat film	up to 850 mm
Label printing / data connection	optional

The Logi Wrap 800: space saving, flexible and powerful

### Your benefits highlighted

- Film bag with stable, durable side seals, completely sealed on all four sides
- Very small footprint. Easy to integrate into the product flow of any supply chain with a minimum of space requirements, or also to be used as a stand-alone solution
- After packing cycle, the product is discharged from the machine
- Packs reliably varying product dimensions in random order
- Capacity speed of up to 1800 cycles per hour
- All usual trade films, such as polyolefin, polyethylene, poly lactide acid (PLA), unprinted, printed, transparent or coloured (opaque) can be easily processed
- Easy integration of label printers and data connection

**Solutions based on Kalfass quality. Competence in production of a wide range of packaging machines, from customer tailored systems to packaging systems for integration into production lines.**
